

WHY IT'S SPECIAL: Prepare to be seriously wowed. This super matte eyeshadow combines the highest matte ever with a super clean composition. It perfectly adheres to the eyelids, releasing a uniform layer of color to be combined with the shimmer version (PW483) for a multi-effect bold look.

This is the most matte compact eyeshadow with the highest percentage of natural ingredients to be found in our portfolio. The micronized pigments mixed in the formula ensure extreme color release, while a blend of emollient esters with different viscosity makes the texture extra adherent to the skin, for an improved payoff.

RAW MATERIALS

Mica	Thanks to its transparency, it prevents a chalky effect.
Micronized Pigments	High load of micronized pigments increase the expected pay-off at its maximum.
Natural Texturizer	Increases the soft feel, creaminess and adherence of the product to the skin.
Blend of Esters	Gives the texture the necessary grip to perfectly adhere to the skin.

MAIN CLAIMS

- One-stroke matte eyeshadow for a multi-effect bold look
- Perfect adherence and skin fusion
- Extreme color release
- High percentage of natural ingredients

FORMULA SPECS

Form: Compact powder
Coverage: Medium to high
Finish: Matte
